COURSE INSTRUCTOR	<p>1. Dr Gokul Kannan, MDS, MOI (Switzerland)</p> 
COURSE CO-ORDINATORS	<p>1. Dr Gokul kannan Contact Number: 9445777945</p>
ABOUT THE COURSE	<p>About Lecture: Basal implants, On the other hand, characterized by their placement in the basal bone, offer immediate loading potential and reduced healing times, while conventional implants rely on osseointegration in the alveolar bone. This Lecture and Hands on analyses clinical outcomes, patient satisfaction, and cost-effectiveness through literature and clinical Experience. Key Points suggest that basal implants may provide a viable alternative for patients with limited bone volume and for those requiring immediate prosthetic solutions. However, the long-term success rates and potential complications associated with both types of implants are critically assessed, highlighting the need for individualized treatment planning.</p> <p>About Hands On Hands on Given to Each Participants aiming to improve their skill in placing Basal, Cortical & Pterygoid Implants in Styrofoam Models & also in Syncrystallization (Intraoral Welding) and Impression and prosthetic steps in Immediate Processing of Shell Denture (within 48 hrs of full mouth Loading)</p>
