<b>ABOUT THE COURSE</b>	<p><b>PURPOSE:</b> The prettiest thing anyone can wear is a perfect smile. One of the most crucial issues in modern dentistry is restoring a patient's lost dental esthetic appearance. Laminates can successfully modify smiles in a rapid, painless and conservative manner with effects that last longer. The course explains about gingival retraction techniques to efficiently replicate the prepared finish line which helps the clinicians to overcome the discrepancy related to marginal fit. Participants also gets an insight on the various impression techniques to meticulously replicate the prepared teeth which will ensure the clinicians that a successful outcome can be achieved. The most important part and the step which most clinicians fall short is the bonding protocols of laminate veneers which will be highlighted and demo of bonding on a live patient will be given.</p> <p><b>LECTURE OUTLINE:</b> (Duration - 2.30 hrs)</p> <ol style="list-style-type: none"> <li>1.Introduction to laminate veneers</li> <li>2.Instrumentation</li> <li>3.Shade selection</li> <li>4.Preparation and its types</li> <li>5.Gingival retraction and Impression procedures</li> <li>6.Bonding protocols</li> <li>7.Maintenance protocols</li> </ol> <p><b>DEMO</b></p>
